

GOOD TO KNOW

# *ARTIFICIAL GRASS*

## COMPOSITION

- Polyurethane or latex base and polyethylene threads. The more sting, the more resistant it will be and the more it will look like real grass.
- Products made in BELGIUM
- Resistance to chlorine / UV / salt water
- 7 to 10 year warranty depending on the model

## LAYING

- Think of the direction of the "hair", avoid the maximum of cuts between the bands for a more visual rendering.
- Provide for the installation of scotch tape between the cuts in the strips of "double-sided tape" at the ends to fix everything
- On an installation on natural floor : 1. Weed 2. Make a bed of sand 3. Install geotextile

## MAINTENANCE & RECOMMANDATIONS

- If the synthetic grass is very exposed to the sun, do not hesitate to water to moisten the material
- Interior: Vacuum using only the flexible hose. Once a year sweep a broom with a soft brush soaked in warm water with a drop of detergent for dishes. Be careful with the use of products that can cause a loss of shine
- Outdoors: Once a year or more regularly spray with water. If the lawn is very dirty, wipe it with a cloth soaked in soapy water, but don't forget to rinse it off with clean water.

## CONTRAINDICATIONS

- acetone or solvent, bleach which can discolor it
- too strong cleaners, use them always diluted
- Do not use a metal broom or rake
